1. INTRODUCTION TO OUR COMPANY

We are Electrical Engineers and Contractors registered in CLASS 1 with the Ministry of Works and Contractors Registration Board. We have been in the business of electrical engineering since 1985. We were upgraded to class 1 in 1989.

We have a wide experience in the field of electrical installation and power line construction works. We have a team of qualified and registered engineers, technicians linesmen and electricians with down to earth experience in their trades. We have a wide range of construction, testing and commissioning equipment.

We are specialized in:

- Industrial, Commercial and Domestic Installations.
- Power Engineering, Test and Commissioning.
- Power line construction and cabling from 400 Volts up to 132,000 Volts.
- Installation and Commissioning Diesel Generators, Transformers, Switchgear and Motors.
- Repair and Servicing Industrial plants, Engines, Generators, Motors Transformers, Switchgear and Power lines.

2. ELECTRICAL DESIGN AND INSTALLATION

For industrial and commercial customers, we are able to design your mains distribution, power supply or lighting installations, together with statutory requirements such as emergency lighting and fire alarm systems. We can also advise on energy conservation, "getting the best" out of your electrical services. We work alongside your builders and other contractors, and ensure any work is carried out with the minimum of disruption.

For domestic customers, we can design your total needs in terms of power outlets and lighting requirements. Building Regulations require all domestic alterations need to be completed to industry standards.

3. POWER LINE CONSTRUCTION

Power Line Construction is a vital part to energize your residence. We build your Power Line to accommodate the property area and to consider the traffic flow. We set up a Pre Job Site Visit, to meet with our Customer to review their plans. We advise our Customer on Clearances, Rules, Standards and provide them with a cost estimate. If we see a way in which we can build Cost-Effectively, we will show you the way on how to save time and money.

4. PROJECT MANAGEMENT TEAM

A typical team would develop, engineer and install the required building services to your initial design, specifications drawings and total requirements, including:

- Pre-commencement engineering administration - including liaison meetings with the main contractor and other key personnel to establish timings
- Planning and manpower allocation
- Planned procurement arrangement: site management and supervision, total planning and co-ordination, workmanship, financial and quality control
- Main contractor and consulting engineer co-ordination
- Plant and equipment
- All specialist services
- Compliance with all standard regulations and statutory requirements
- Safety matters
- Completion and commissioning documentation
- Financial control and final accounting agreements

The project team's primary objective is to provide a comprehensive installation service on time and within budget, to the complete satisfaction of the client, his professional advisers and main contractor.

Proposed Electrical Installation at NSSF Kaloleni Arusha	NSSF Dar es salaam	Electrical and Fire Detection (December, 2012)
Proposed Extension of Ocean Road Cancer Institute	Ocean Road Cancer Institute, Dar es salaam	Electrical and Fire Detection (November, 2011)

8. SPECIALIST WORKS

ENERGY SERVICES LIMITED, we are company that specializes also with supply, installing and maintaining of street lighting. Maintenance of street lighting activities consists of repair of electrical wiring and light fixtures, replacement of lamps, repair and replacement of damaged equipment caused by auto accidents and vandalism.

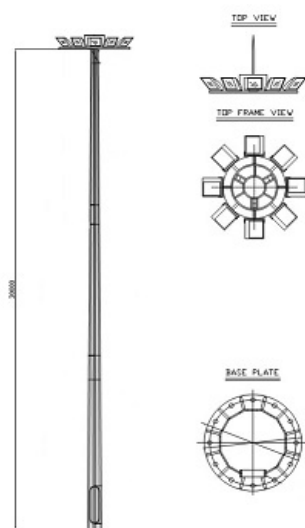

Street Lighting

We work with main contractors, councils and highway agencies we support a partnering approach wherever possible and can arrange for the design of schemes, project managing them through to completion. Alternatively, we can work with your own designers to produce optimum solutions, drawing on our extensive experience. While running an efficient operation, we are acutely aware of safety issues: the safety of the public and our operatives is paramount.

Exterior Lighting

Recognising the impact brighter and well maintained lighting has on local communities, our Specialist Electrical team is dedicated to the provision of design, installation and maintenance of street and car park lighting. Our services are designed around the requirements of local authority contracts and private lighting schemes.

We are committed to the delivery of external lighting solutions and the provision of safer and harmonious designed local streets. We can offer you a complete concept design, project management and installation package or work with your designers to produce optimum solutions - the choice is yours.

Our Services:

- Design and client consultations
- Project management
- Procurement
- Storage and handling
- Installation
- Testing and maintenance
- Refurbishment and removal

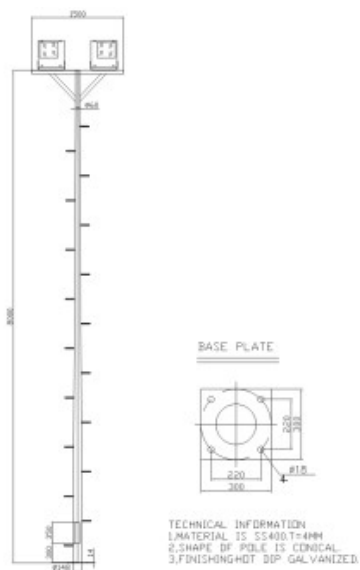

Whatever we do, we always pay close attention to both the safety of the public and of our own people.

Our Exterior Lighting Range

Our expert Exterior Lighting team can work to provide vibrant, sustainable and well maintained lighting for a range of lighting needs and requirements:

- LED
- Decorative Lighting
- Flood Lighting
- Road Lighting
- Feature Lighting

These can be installed and maintained for different sites and contracts:

- Car Parks
- Roads
- Pedestrian Areas

EXPERINCE AND PAST PERFORMANCE

We have been involved with number of projects particularly in street lighting. Below are some of works.

PROJECT NAME	NAME OF CLIENT AND ADDRESS	TYPE OF WORK AND YEAR OF COMPLETION
Proposed Works for the One Stop Border Post - Tunduma	Tan Roads Agency	New installation (December, 2019)
Proposed Works for the One Stop Border Post - Namanga	Tan Roads Agency	New installation (December, 2015)
Proposed Library for Mzumbe University at Mbeya Campus	Mzumbe University Morogoro	New installation (August, 2014)
Proposed Zonal Office Building Shinyanga Region	National Audit Office Dar es salaam	Service installation (November, 2014)
